Investment Policy

The Fund will invest at least two thirds of its net assets in equity and equity related transferable securities listed or traded on recognised markets and/or other collective investment schemes which provide exposure to companies that are domiciled in, or which derive a majority of their economic value, revenue, profits, assets or employee base from emerging markets ex India. The Fund may invest up to one third of its net assets in securities other than those mentioned above.

The fund is designed for:

The fund is designed for investors who are looking for a fund that accesses the dynamic emerging markets ex India offering potentially higher returns but with a potentially higher risk profile than that of a more diversified global equity fund. While the fund seeks to achieve its investment objective, investors should understand that the fund's investment objective may not be realised and some or all of your investment is at risk. For further specific risks related to the fund please refer to Risk Considerations below

Investment Strategy

Seeks to build a long-only portfolio of securities at attractive values through a bottom-up selection process.

Key risk factors:

Market and Selection Risk: Market risk is the risk that the market will go down in value, with the possibility that such changes will be sharp and unpredictable. Selection risk is the risk that the investments that a Fund's portfolio managers select will underperform the market or other funds with similar investment strategies.

Emerging and Frontier Markets Risk: Investing in emerging and frontier markets involves additional risks not typically associated with investing in more established economies and markets. Such risks may include greater social, economic and political uncertainty.

Risks associated with investments in China: The Fund's financial results could be adversely affected by adjustments in the PRC's state plans, political, economic and social conditions, changes in the policies of the PRC government and laws and regulations, in particular where investments are made through Stock Connect.

Currency Risk: Many of the Fund's investments will be denominated in currencies other than the currency of the share class purchased by the investor which may be affected by adverse currency movements. The Fund will not attempt to hedge against currency fluctuations.

Derivatives Risk: The Fund may invest in FDIs to hedge against risk and/or to increase return. The use of derivatives may create leverage that could magnify both gains and losses. There is no guarantee that the Fund’s use of derivatives for either purpose will be successful. Derivatives are subject to counterparty risk (including potential loss of instruments) and are highly sensitive to underlying price movements, interest rates and market volatility and therefore come with a greater risk.

Operational Risk (including safekeeping of assets): The Fund and its assets may experience material losses as a result of technology/system failures, cybersecurity breaches, human error, policy breaches, and/or incorrect valuation of units.

Liquidity Risk: The Fund may invest in securities which may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavourable price. This may affect the overall value of the Fund.

Equities Risk: The Fund may invest in equity securities which are subject to greater fluctuations than other assets. Factors which may affect the fluctuations include economic conditions, industry or company news. High volumes of trading may also see increased transaction costs.

Sustainability Risk: The Fund may be subject to sustainability risk which is the risk that an environmental, social or governance event or condition, if it occurs, may have a material negative impact on the value of an investment. Sustainability Risk relates solely to potential financial impacts from ESG events; it should not be interpreted as indicating that the Fund seeks to deliver positive environmental or social benefits.

Attention is drawn to the risk that the value of the principal invested in the Fund may fluctuate.
For more information on risks, please see the section entitled “Investment Risks” in the Prospectus of the ICAV and Supplement of the Fund.
