

# Parag Parikh Global Investing Strategy (PPGIS)

Factsheet - November, 2025

PPGIS is a PMS strategy that seeks to generate long-term capital appreciation through an actively managed portfolio primarily comprising global equities and related securities, excluding India. PPGIS aims to provide investors access to international markets, enabling diversification beyond domestic exposures, reducing country-specific risks, and participating in global innovation and growth themes that may be underrepresented or unavailable in India.

While the objective is to achieve long-term wealth creation through disciplined global investing, there is no assurance or guarantee that the investment objective of the PMS will be achieved. The PMS does not guarantee or promise any returns.

## Key facts of the Scheme

|                         |                                    |
|-------------------------|------------------------------------|
| Minimum Ticket Size     | US\$ 75,000                        |
| Base Currency           | USD                                |
| Investment & Redemption | All business days                  |
| Exit Load/Lock-in       | No exit load or Lock-in applicable |

## Portfolio Construction

We internally maintain a Model Portfolio constructed using our predefined stock-selection criteria. This Model Portfolio defines the position sizing as well as valuations at which we would be comfortable buying a stock and our intention is to align each client's portfolio to this Model Portfolio. However, due to market movements and timing differences at the point of deployment, it may not always be possible to replicate the Model Portfolio exactly.

In such situations, we may temporarily hold cash and deploy it opportunistically when valuations are favorable. Consequently, individual client portfolios may exhibit variations in security-level weights, cash levels, and performance when compared with the consolidated Portfolio as shown below.

Owing to this methodology of portfolio construction and the fact that we saw meaningful clients onboarding near the end of the month, the cash position shown below is reasonably high.

| Particulars                       | PPGIS – TWR | S&P 500 Net TR Index |
|-----------------------------------|-------------|----------------------|
| Since Inception (August 27, 2025) | 4.45%       | 6.16%                |
| Last 1 Month                      | 0.14%       | 0.03%                |
| Last 3 Months                     | 4.43%       | 6.97%                |

\*as at November 30, 2025

Note :-

1) Past performance is not indicative of future returns.

2) The performance figures are calculated on time weighted basis (TWR) consolidating all investors' funds under DPMS strategy, net off all fees and expenses.

## PPGIS PMS Allocations

|                             |        |
|-----------------------------|--------|
| Equity & related Instrument | 53.88% |
| Cash & Equivalents          | 46.12% |
| Top 10 Holding %            | 43.30% |

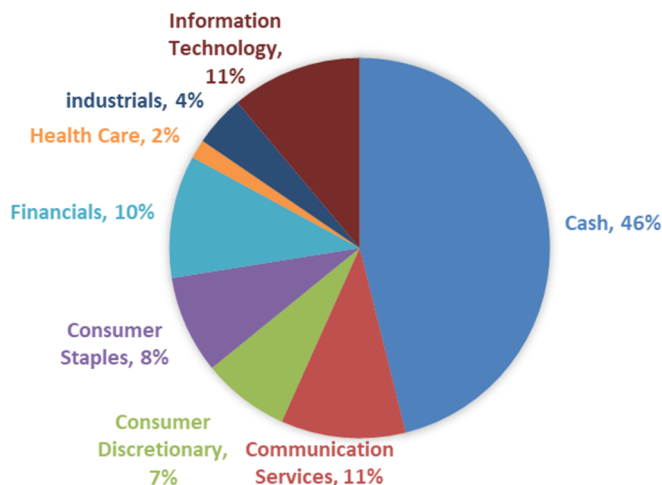

\*as at November 30, 2025

Note - allocation numbers of individual portfolio may vary from consolidated metrics shown above because of the difference in timing of inflows and outflows of funds.

## Top 10 Holdings & Sector allocation

|                  |
|------------------|
| Amazon           |
| DBS Group        |
| Heineken         |
| JP Morgan        |
| Kimberly Clark   |
| Meta Platforms   |
| Microsoft        |
| Qualcomm         |
| Ryanair Holdings |
| Unilever Plc     |

\*as at November 30, 2025

Note – Performance of individual portfolio may vary from that of other investors as well as the consolidated metrics shown above because of the timing of inflows and outflows of funds.
