

Global Gold & Silver Miners Fund

A multi-cap Cat III open-ended equity AIF investing into small & mid-cap

Performance

Gold & Silver Miners' Fund

	1m	3m	6m	SI
Rational	-2.5%	-9.7%	21.9%	73.4%
GDXJ	-3.1%	-6.2%	24.2%	78.1%

Portfolio Selection Process

Production

Target material production growth over a 5yr horizon and a reduction in costs

Price

Target miners trading at cheap valuations, high FCF yield / deep discount to NAV) to achieve alpha over the commodity

Politics

Strategically avoid miners with mines in politically unstable countries and restrict to less regulated environments

The process yields junior miners that are cheap + ~20% FCF + ~25% p.a. production growth + safe jurisdiction

Our Portfolio

- ★ Miners that **don't** need to dilute equity anymore to fund capex
- ★ Miners that are in the **midst** of a rerating cycle
- ★ Miners that **target** high production growth, low costs and are **cheap**

US\$ bn
7

Market cap vs US\$ 65bn of GDX

23%

FCF yield for 2025F vs 8% of GDX

5-8

P/E

70%

Portfolio companies net in cash

121%

5 yr production growth vs 17% of GDX

Miners – a more profitable proxy to Gold

- 1 Miners have operating leverage so bottom line ++ when gold rises
- 2 Miners still in the early stages of strategic re-rating as M&A activity well below peak levels
- 3 Supercycles in commodities like oil evidence that miners to materially higher upside
- 4 Miners still early in their capex cycle

		Gold (US\$/ounce)	Silver (US\$/ounce)	Rational FCF
Robust Downside Protection	Scenario 1	3500	60	13%
	Scenario 2	4000	70	16%
	Scenario 3	4500	80	19%
	Scenario 4	5000	100	23%

Product Parameters

Parameters	Gold & Silver Miners Fund
Vehicle	Cat III AIF – Long Only – Open ended
Min Investment	US\$ 150,000
Who can invest	Individuals through LRS; Cos. through ODI/OPI route – can invest 50% of net worth of company
Taxation	At fund level – STCG ~40%, LTCG 12.5%
